

We are concerned that low power fm stations will be allowed to have priority over translator stations on the same frequency. We strongly believe that translators which allow us to listen to a national station (KLOVE 102.3 and 104.3) is very important. These translators provide programing that would otherwise be unavailable in our area. We are positively affected by this station on a daily basis and know countless others in our area that are positively affected as well. Thank you for continuing to allow us to hear the programing we love on our air waves.
